EDUCATION

IIT Dharwad

2021 – 2025

Bachelor of Technology in Mechanical Engineering

WORK EXPERIENCE

Web Developer *Suvidha Foundation*

Aug 2024 – Sep 2024

Contributed to website development using HTML, CSS3, and JavaScript. Optimized site performance by compressing images, minifying scripts, and reducing load times. Ensured cross-browser compatibility by testing and debugging across multiple browsers. Implemented new techniques to improve UI/UX. 

Teaching Assistant - HoE, Control Systems Lab and Fluid Mechanics Lab *IIT Dharwad*

Jan 2025 – Apr 2025

Assisted in conducting lab sessions, grading assignments, and helping students understand key concepts. Guided experiments and troubleshooting technical issues.

PROJECTS

Slotify (React.js, API)

Developed an online booking system using React.js, React Router, Hooks, and Redux to allow users to schedule banking slots. Reduced wait times and improved customer satisfaction.

Virtual Prototyping of DSIF Using Unity

Designed a 3D model of a 6-axis CNC machine in SOLIDWORKS and integrated it into VR using Unity. Developed G-code execution scripts to simulate multi-axis toolpaths and machining operations.

Energy Consumption Analysis (MySQL)

Performed in-depth SQL-based analysis on emissions, GDP, and population datasets to identify global emission patterns, efficient economies, and per capita trends. Created queries for emission-to-GDP ratio, per capita analysis, and top/bottom contributors. Derived insights for sustainability and policy recommendations.

HR Data Analysis Dashboard (Power BI)

Developed an interactive HR Dashboard in Power BI to analyze data from **311 employees**, including **207 active staff**. Tracked key metrics such as **average salary (69K)**, **engagement score (4.11)**, and workforce distribution by department, gender, and marital status. Provided insights into salary trends across departments, citizenship breakdown, and termination patterns. Helped identify workforce concentration, optimize resource allocation, and support data-driven HR decisions.

TECHNICAL SKILLS

Languages: C, Java, Bash, Python, JavaScript, L^AT_EX, C, SQL

Web Technologies: HTML, CSS, JavaScript, RESTful API, React.js

Simulation & Development Tools: Unity, G-code, Git/GitHub, VS Code, Eclipse, SOLIDWORKS, 3DEXPERIENCE

Technologies & Concepts: Virtual Reality (VR), CNC Programming, Digital Twin, Multi-Axis Toolpath Simulation, Power BI, MySQL

CERTIFIED COURSES

Full Stack Web Development

Business Analyst

Python Programming

POSITIONS OF RESPONSIBILITY

Coordinator, ShodhYAntrikI, IIT Dharwad

Oct 2023 – Nov 2023

Led a team of 20 students in organizing an Annual Symposium with 200+ participants, including competitions, poster presentations, and workshops.

Member, IIC, IIT Dharwad

Aug 2023 – Apr 2025

Collaborated with peers to conduct engaging events and sessions.

Council Member, Focus (Photography Club), IIT Dharwad

Jan 2023 – Apr 2025

Organized photography workshops and events, fostering a photography community.
